DRAFT

Changes to clause 9.1

[...]

The DELETE operation on the OCF Cloud's "/oic/sec/account" Resource should behave as follows:

- To deregister with the OCF Cloud, a DELETE operation shall be sent with the "accesstoken" and either the "uid" or "di" Properties to be deregistered with the OCF Cloud. In case the "di" Property is omitted in a DELETE operation, the OCF Cloud is expected to deregister the Device with a matching "accesstoken" Property value. On DELETE with the OCF Cloud, the Device should also delete values internally stored. Once deregister with an OCF Cloud, Device can connect to any other OCF Cloud. Device deregistered need to go through the steps in 6 again to be registered with the OCF Cloud.
