196		

197

198 **1 Scope**

199 The OCF Core specifications are divided into a series of documents:

- 200 – Core specification: The Core specification document specifies the Framework, i.e., the OCF  
201 core architecture, interfaces, protocols and services to enable OCF profiles implementation for  
202 Internet of Things (IoT) usages and ecosystems. This document is mandatory for all Devices to  
203 implement.
- 204 – Core optional specification (this document): The Core optional specification document specifies  
205 the Framework, i.e., the OCF core architecture, interfaces, protocols and services to enable  
206 OCF profiles implementation for Internet of Things (IoT) usages and ecosystems that can  
207 optionally be implemented by any Device.
- 208 – Core extension specification(s): The Core extension specification(s) document(s) specifies  
209 optional OCF Core functionality that are significant in scope (e.g., Wi-Fi easy setup, Cloud).

210

211 **2 Normative references**

212 The following documents, in whole or in part, are normatively referenced in this document and are  
213 indispensable for its application. For dated references, only the edition cited applies. For undated  
214 references, the latest edition of the referenced document (including any amendments) applies.

237 **3 Terms, definitions, and abbreviated terms**

238 **3.1 Terms and definitions**

239 For the purposes of this document, the terms and definitions given in ISO/IEC 30118-1:2018.  
240 ISO/IEC 30118-2:2018, and the following apply.

241 ISO and IEC maintain terminological databases for use in standardization at the following  
242 addresses:

- 243 – ISO Online browsing platform: available at <https://www.iso.org/obp>.
- 244 – IEC Electropedia: available at <http://www.electropedia.org/>.

245 **3.1.1**

246 **Alert**

247 information provided by the Device by means of a specialised Resource Type that provides details  
248 with regard to potential problems, issues, or Device status of interest on which action can be taken

249 **3.1.2**

250 **Scene**

251 a static entity that stores a set of defined Property values for a Collection of Resources

252 Note 1 to entry: A Scene (3.1.2) is a prescribed setting of a set of Resources with each having a predetermined value  
253 for the Property that has to change.

254 **3.1.3**

255 **Scene Collection**

256 a Collection that contains an enumeration of possible Scene Values (3.1.5) and the current Scene  
257 Value (3.1.5)

258 Note 1 to entry: The member values of the Scene Collection (3.1.3) are Scene Members (3.1.4).

259 **3.1.4**

260 **Scene Member**

261 a Resource that contains mappings of Scene Values (3.1.5) to values of a Property in the Resource

262 **3.1.5**

263 **Scene Value**

264 a Scene (3.1.2) enumerator representing the state in which a Resource can be

265 **4 Document conventions and organization**

266 **4.1 Conventions**

267 In this document a number of terms, conditions, mechanisms, sequences, parameters, events,  
268 states, or similar terms are printed with the first letter of each word in uppercase and the rest  
269 lowercase (e.g., Network Architecture). Any lowercase uses of these words have the normal  
270 technical English meaning.

271 **4.2 Notation**

272 In this document, features are described as required, recommended, allowed or DEPRECATED as  
273 follows:

274 Required (or shall or mandatory)(M).

- 275 – These basic features shall be implemented to comply with Core Architecture. The phrases "shall  
276 not", and "PROHIBITED" indicate behaviour that is prohibited, i.e. that if performed means the  
277 implementation is not in compliance.

278 Recommended (or should)(S).

- 279 – These features add functionality supported by Core Architecture and should be implemented.  
 280 Recommended features take advantage of the capabilities Core Architecture, usually without  
 281 imposing major increase of complexity. Notice that for compliance testing, if a recommended  
 282 feature is implemented, it shall meet the specified requirements to be in compliance with these  
 283 guidelines. Some recommended features could become requirements in the future. The phrase  
 284 "should not" indicates behaviour that is permitted but not recommended.

285 Allowed (may or allowed)(O).

- 286 – These features are neither required nor recommended by Core Architecture, but if the feature  
 287 is implemented, it shall meet the specified requirements to be in compliance with these  
 288 guidelines.

289 DEPRECATED.

- 290 – Although these features are still described in this document, they should not be implemented  
 291 except for backward compatibility. The occurrence of a deprecated feature during operation of  
 292 an implementation compliant with the current document has no effect on the implementation's  
 293 operation and does not produce any error conditions. Backward compatibility may require that  
 294 a feature is implemented and functions as specified but it shall never be used by  
 295 implementations compliant with this document.

296 Conditionally allowed (CA).

- 297 – The definition or behaviour depends on a condition. If the specified condition is met, then the  
 298 definition or behaviour is allowed, otherwise it is not allowed.

299 Conditionally required (CR).

- 300 – The definition or behaviour depends on a condition. If the specified condition is met, then the  
 301 definition or behaviour is required. Otherwise the definition or behaviour is allowed as default  
 302 unless specifically defined as not allowed.

303 Strings that are to be taken literally are enclosed in "double quotes".

304 Words that are emphasized are printed in italic.

305 In all of the Property and Resource definition tables that are included throughout this document the  
 306 "Mandatory" column indicates that the item detailed is mandatory to implement; the mandating of  
 307 inclusion of the item in a Resource Payload associated with a CRUDN action is dependent on the  
 308 applicable schema for that action.

### 309 **4.3 Data types**

310 Resources are defined using data types derived from JSON values as defined in clause 4.3 in  
 311 ISO/IEC 30118-1:2018.

## 312 **5 Functional interactions**

### 313 **5.1 Introduction**

314 The functional interactions between a Client and a Server are described in 5.2 through 5.6  
 315 respectively. The functional interactions use CRUDN messages (clause 8 in ISO/IEC 30118-1:2018)  
 316 and include Discovery, Notification, and Device management. These functions require support of  
 317 core defined Resources as defined in Table 1.

318 **Table 1 – List of optional Core Resources**

Pre-defined URI	Resource Name	Resource Type	Related Functional Interaction	Mandatory
(none)	Configuration	"oic.wk.con"	Device management	No

(none)	Configuration	"oic.wk.con.p"	Device management	No
"/oic/mnt"	Maintenance	"oic.wk.mnt"	Device management	No
(none)	Network monitoring	"oic.wk.nmon"	Device management	No
(none)	Software update	"oic.wk.softwareupdate"	Device management	No
(none)	Icon	"oic.r.icon"	Icons	No
(none)	Scene List	"oic.wk.scenelist"	Scenes	No
(none)	Scene Collection	"oic.wk.scenecollection"	Scenes	No
(none)	Scene Member	"oic.wk.scenemember"	Scenes	No
(none)	Alerts	"oic.r.alert"	Alerts	No
(none)	Alerts Collection	"oic.r.alertcollection"	Alerts	No

319

320 **5.2 Onboarding, provisioning and configuration**

321 Onboarding and provisioning are fully defined by the ISO/IEC 30118-2:2018.

322 Should a Device support Client update of configurable information it shall do so via exposing an  
323 "oic.wk.con" Core Resource (Table 2) in "/oic/res".

324

**Table 2 – Configuration Resource**

Example URI	Resource Type Title	Resource Type ID ("rt" value)	OCF Interfaces	Description	Related Functional Interaction
"/example/oic/con"	Device configuration	"oic.wk.con"	"oic.if.rw"	The Resource Type through which configurable information specific to the Device is exposed.  The Resource Properties exposed in "oic.wk.con" are listed in Table 3.	Configuration
"/example/oic/con"	Platform configuration	"oic.wk.con.p"	"oic.if.rw"	The optional Resource Type through which configurable information specific to the Platform is exposed. The Properties exposed in "oic.wk.con.p" are listed in Table 4.	Configuration

325

326 Table 3 defines the "oic.wk.con" Resource Type.

327

**Table 3 – "oic.wk.con" Resource Type definition**

Property title	Property name	Value type	Value rule	Unit	Access mode	Mandatory	Description
(Device) Name	"n" (Common Property of "/example/oic/con")	"string"	N/A	N/A	R, W	Yes	Human friendly name configurable by the end user (e.g. Bob's thermostat). The "n" Common Property of the oic.wk.con Core Resource and the "n" Common Property of the "/oic/d" Core Resource shall have the same Value. When the "n" Common Property Value of the oic.wk.con Core Resource is modified, it shall be reflected to

							the "n" Common Property of "/oic/d" Core Resource.
Location	"loc"	array of float (has two elements, the first is latitude, the second is longitude)	N/A	Degrees	R, W	No	Provides location information where available.
Location Name	"locn"	"string"	N/A	N/A	R, W	no	Human friendly name for location For example, "Living Room".
Currency	"c"	"string"	N/A	N/A	R,W	no	Indicates the currency that is used for any monetary transactions
Region	"r"	"string"	N/A	N/A	R,W	no	Free form text Indicating the current region in which the Device is located geographically.
Localized Names	"ln"	"array"	N/A	N/A	R,W	no	Human-friendly name of the Device, in one or more languages. This Property is an array of objects where each object has a "language" field (containing an IETF RFC 5646 language tag) and a "value" field containing the Device name in the indicated language. If this Property and the Device Name (n) Property are both supported, the Device Name (n) value shall be included in this array.
Default Language	"dl"	"language-tag"	N/A	N/A	R,W	no	The default language supported by the Device, specified as an IETF RFC 5646 language tag. By default, clients can treat any string Property as being in this language unless the Property specifies otherwise.

328

329 Table 4 defines the "oic.wk.con.p" Resource Type.

330 **Table 4 – "oic.wk.con.p" Resource Type definition**

Property title	Property name	Value type	Value rule	Unit	Access mode	Mandatory	Description
Platform Names	"mnpn"	"array"	N/A	N/A	R,W	No	Friendly name of the Platform.. This Property is an array of objects where each object has a "language" field (containing an IETF RFC 5646 language tag) and a "value" field containing the platform friendly name in the indicated language.  For example,

							[{"language":"en", "value":"Dave's Laptop"}]
--	--	--	--	--	--	--	--

331

### 332 **5.3 Device management**

#### 333 **5.3.1 Overview**

334 Device management includes the following functions:

- 335 – Diagnostics and maintenance
- 336 – Network monitoring

#### 337 **5.3.2 Diagnostics and maintenance Resource Type**

338 The Diagnostics and Maintenance Resource Type is intended to enable the resolution of issues  
 339 encountered with the Devices while operating in the field. If diagnostics and maintenance is  
 340 supported by a Device, the Core Resource "/oic/mnt" shall be supported as described in Table 5.

341 **Table 5 – Optional diagnostics and maintenance Device management Core Resources**

Pre-defined URI	Resource Type Title	Resource Type ID ("rt" value)	OCF Interfaces	Description	Related Functional Interaction
"/oic/mnt"	Maintenance	"oic.wk.mnt"	"oic.if.rw"	The Resource through which the Device is maintained and can be used for diagnostic purposes. The Properties exposed by "/oic/mnt" are listed in Table 6.	Device management

342 Table 6 defines the "oic.wk.mnt" Resource Type. At least one of the Factory\_Reset, Reboot, or last  
 343 error Properties shall be implemented.

344 **Table 6 – "oic.wk.mnt" Resource Type definition**

Property title	Property name	Value type	Value rule	Unit	Access mode	Mandatory	Description
<b>Factory_Reset</b>	"fr"	"boolean"	N/A	N/A	R, W	No	When writing to this Property: false – No action (Default) true – Start Factory Reset When reading this Property, a value of true indicates a pending factory reset. Once the factory reset has been completed, the Device shall set the value back to false. This Property is functionally equivalent to a transition to a state of Hard Reset as defined in ISO/IEC 30118-2:2018, clause 8.1
<b>Reboot</b>	"rb"	"boolean"	N/A	N/A	R, W	No	When writing to this Property: false – No action (Default) true – Start Reboot After Reboot, this value shall be changed back to

							the default value (i.e., false)
Last error	"err"	"integer"	HTTP error code	N/A	R	No	Last occurred error code, shall be cleared to 503 (service unavailable), when doing a Factory Reset or Reboot. All HTTP errors outside the 100, 200 or 300 range shall be stored.

345

346 NOTE Default indicates the value of this Property as soon as the Device is rebooted or factory reset.

347 **5.3.3 Core behaviours on Device maintenance state changes**348 **5.3.3.1 Overview**349 As defined in ISO/IEC 30118-2:2018 a Device has a state machine through which it transitions  
350 during its operational lifetime.351 ISO/IEC 30118-2:2018 details actions on such state transitions for the Resources defined therein.  
352 This clause defines the actions to be taken on such state transitions for the Resources and  
353 functionality defined within this document.

354 The state transitions to be considered are:

- 355 – RFNOP to Soft Reset
- 356 – RFNOP to Hard Reset
- 357 – RFNOP to RFPRO
- 358 – RFPRO to RFNOP

359 Table 7 provides a summary of the actions to be taken in each case.

360 **Table 7 – Actions on Device state change**

	Soft reset	Hard reset	RFNOP -> RFPRO	RFPRO -> RFNOP
<b>SVR</b>	As per ISO/IEC 30118-2:2018 clause 8.5.	As per ISO/IEC 30118-2:2018 clause 8.1.	As per ISO/IEC 30118-2:2018 clause 8.3.	As per ISO/IEC 30118-2:2018 clause 8.4.
<b>Vertical Resources</b>	No change.	Reset to defined defaults; see clause 5.3.3.3.	No change.	No change.
<b>Created Resources</b>	No change.	Deleted.	No change.	No change.
<b>Observe Transactions</b>	No change.	Canceled; see clause 5.3.3.2.	No change	Re-evaluate ACL; see clause 5.3.3.2.

361

362 **5.3.3.2 Handling of Observe transactions**363 On a transition to hard reset all active Observe transactions shall be cancelled by the Server by  
364 sending a "Service Unavailable" response on each active Observe transaction.365 On a state transition that allows for modification of the access controls that exist against a Resource  
366 (such as from RFPRO to RFNOP) it is possible that the access controls themselves as defined  
367 within the ISO/IEC 30118-2:2018 are changed such that the original RETRIEVE operation that  
368 established the Observe would not have been allowed. In such instances the Server shall cancel  
369 the Observe by sending a "Service Unavailable" response on the Observe transaction.

370 **5.3.3.3 Reset of Resource Properties to defined defaults**

371 **5.3.3.3.1 Overview**

372 On a hard or factory reset Resource Properties are reset to default values. These are commonly  
373 referred to as *manufacturer defaults* however it is not possible in all instances to revert to such  
374 values as they may not be known or be practicable.

375 The default values to be applied for any Vertical Resources are defined in the following clause.

376 **5.3.3.3.2 Defaults for Vertical Resources**

377 Default values for any Vertical Resources exposed by a Device are up to the implementation.

378 **5.3.4 Network monitoring Resource Type**

379 Network monitoring is used for monitoring the current network state of the Device.

380 The network monitoring Resource Type is "oic.wk.nmon" and is described in Table 8. The Resource  
381 Type may occur multiple times if more than 1 network interface is implemented. The Common  
382 Property "n" may be used to distinguish the different network interfaces, like distinguish the 2.4  
383 and 5G Wi-Fi network interfaces.

384 **Table 8 – Optional monitoring Device management Core Resources**

Example URI	Resource Type Title	Resource Type ID ("rt" value)	OCF Interfaces	Description	Related Functional Interaction
"/example/oic/nmon"	Network Monitoring	"oic.wk.nmon"	"oic.if.rw", "oic.if.baseline"	The Resource through which the Device is monitored.  The Resource exposes Properties relevant to aspects that may be monitored. The Resource Properties exposed by Resource Type "oic.wk.nmon" are listed in Table 9	Device management

385

386 Table 9 defines "oic.wk.nmon" Resource Type.

387 **Table 9 – "oic.wk.nmon" Resource Type definition**

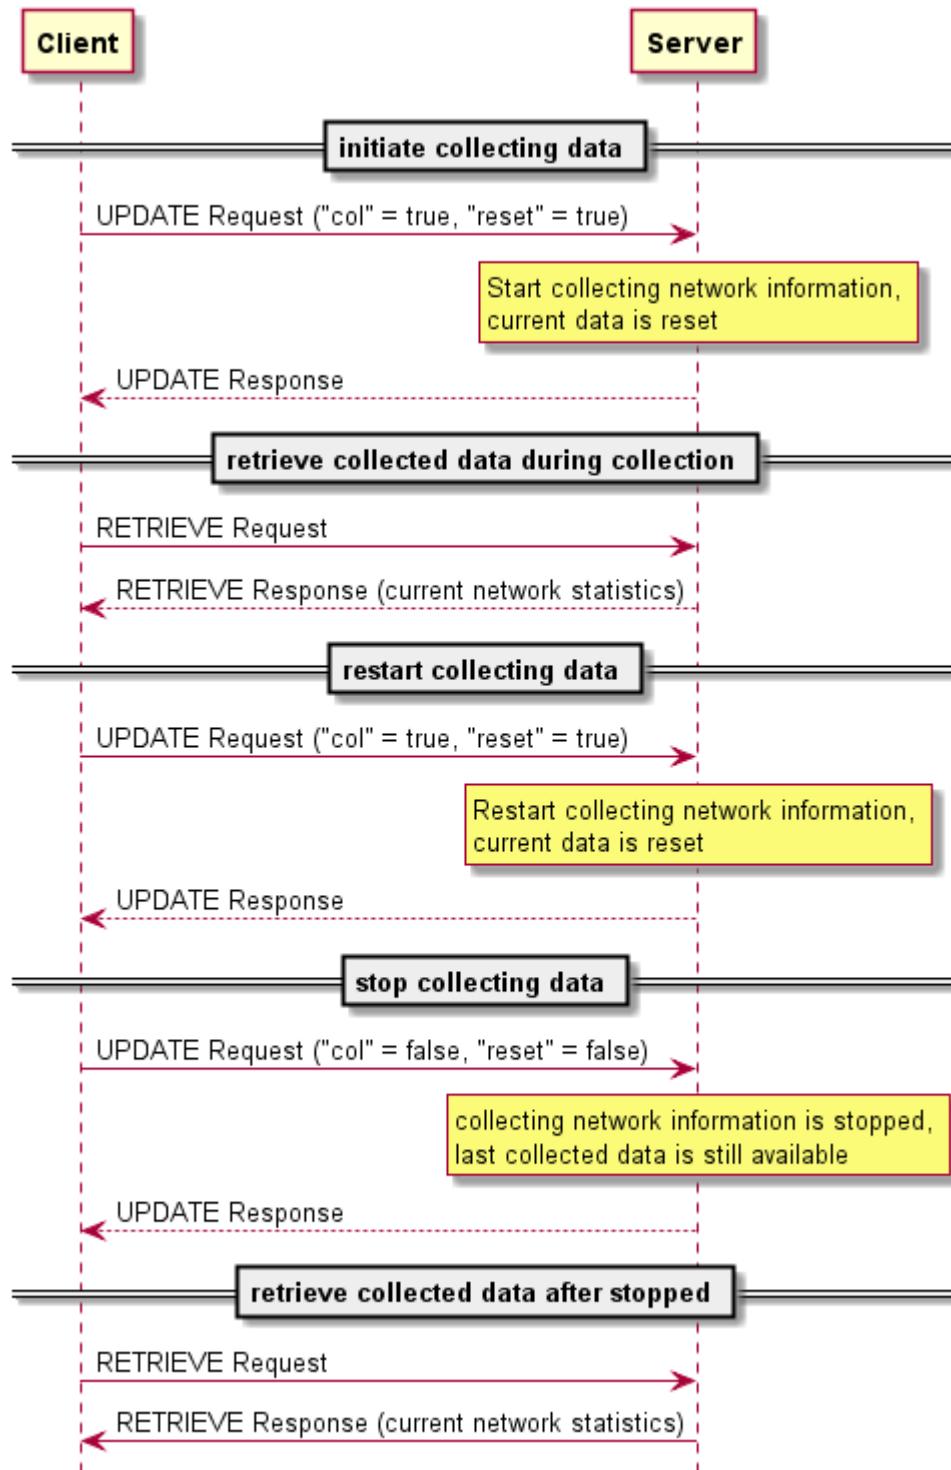

Property title	Property name	Value type	Value rule	Unit	Access mode	Mandatory	Description
Network indicator	"ianaifType"	"integer"	The integer value of the ianaifType	N/A	R	Yes	The network type this Resource is collecting information from as defined by IANA ifType-MIB Definitions.
reset	"reset"	"boolean"	True, all collected values should be reset. The server should reset the value automatically to	N/A	RW	Yes	Reset of the collected values

			false after the reset occurred.				
Collecting status indication	"col"	"boolean"	True: collecting data. False: not collecting data	N/A	RW	Yes	Boolean to start/stop collecting data.
Transmission bytes	"tx"	"integer"	N/A	kilo bytes	R	No	Amount of transmitted kilo bytes from the collection
Reception bytes	"rx"	"integer"	N/A	kilo bytes	R	No	Amount of received kilo bytes from the collection.
Maximum message size tx	"mmstx"	"integer"	bytes	bytes	R	No	Maximum transmitted message, e.g. Max(tx) in the collection period
Maximum message size rx	"mmsrx"	"integer"	bytes	bytes	R	No	Maximum received message, e.g. Max(rx) in the collection period
Average message size -tx	"amstx"	"integer"	bytes	bytes	R	No	Average transmitted message size, e.g AVG(tx) in the collection period.
Average message size -rx	"amsrx"	"integer"	bytes	bytes	R	No	Average received message size e.g AVT( rx) in the collection period.

388

389 Examples of typical used values for ianaIfType are 71 (ieee80211) for Wi-Fi and 6 (ethernetCsmacd)  
 390 for Ethernet.

391 A Device should start collecting network monitoring data when receiving an UPDATE operation  
 392 with the parameter "col" = true. A Device should stop collecting network data when receiving an  
 393 UPDATE operation with parameter "col" = false. The collected network data should be reset when  
 394 an UPDATE operation with parameter "reset" = true is received, if the parameter "reset" is false  
 395 then the values should not be reset. Figure 1 illustrates the interactions with the network monitoring  
 396 Resource.

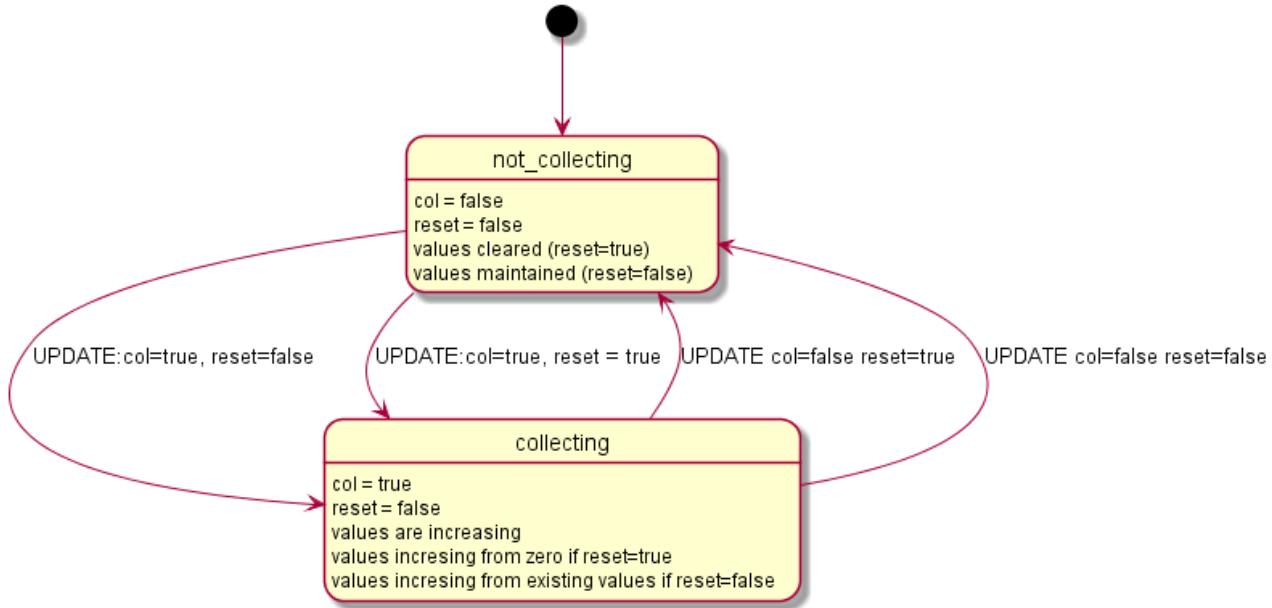

397

398

### Figure 1 – Interactions with the network monitoring Resource

399 The state transition diagram for collecting or not collecting network information is described by  
400 Figure 2.

**Figure 2 – State transition diagram of collecting network information**

### 5.3.5 Software update Resource Type

The software update Resource is used to control software updatas of the Device.

In ISO/IEC 30118-2:2018 there is already a manual triggered software update mechanism available. The triggering of the Client (manual) software update is achieved via the security Resource Type "oic.r.pstat" by using the appropriate bits in the "tm" Property. The software update triggering results in updates of the "cm" Property in the "oic.r.pstat" Resource Type (see ISO/IEC 30118-2:2018 clause 13.8). The software update Resource adds additional features to the security specified mechanism, like:

- Specify the source to obtain the software package.
- Time scheduled software update actions.
- Status information, especially more info about various error situations.

If the Device implements the software update Resource, it is required to implement the software update behaviour to actually update the software of the Device as indicated by the "oic.r.pstat" "cm" bits as defined in ISO/IEC 30118-2:2018 clause 13.8. Also the security defined software update process shall use the data that is set on the software update Resource like the "purl" Property.

The software update Resource Type is "oic.r.softwareupdate" and is described in Table 10.

**Table 10 – Optional software update Resources**

Example URI	Resource Type Title	Resource Type ID ("rt" value)	OCF Interfaces	Description	Related Functional Interaction
"/example/oic/swupd"	Software Update	"oic.r.softwareupdate"	"oic.if.rw", "oic.if.baseline"	The Resource exposes Properties to control and monitor the software update mechanism. The Properties exposed by Resource Type	Device management

				"oic.r.softwareupdate" are listed in Table 11.	
--	--	--	--	---	--

421

422 Table 11 defines the Properties of the "oic.r.softwareupdate" Resource Type.

423 **Table 11 – "oic.r.softwareupdate" Resource Type definition**

Property title	Property name	Value type	Value rule	Unit	Access mode	Mandatory	Description
New version	"nv"	"string"	N/A	N/A	R	No	New available software version.
Package url	"purl"	"string"	URL	N/A	RW	Yes	Source of the software package, might be an HTTPS or a CoAPs URL.
Action	"swupdateaction"	"string"	enum (see Table 13)	N/A	RW	Yes	Scheduled action to do a software update.
State	"swupdatestate"	"string"	enum (see Table 12)	N/A	R	Yes	State of the software update.
Result	"swupdateresult"	"integer"	N/A	N/A	R	Yes	Result of the software update. List of error codes are as defined in Table 14.
Lastupdate	"lastupdate"	"string"	date-time	N/A	R	No	Time of the last software update according to IETF RFC 3339. Initial set on date of manufacturing.
Signage	"signed"	"string"	enum	N/A	R	No	Signage method of the software package, currently the only allowed value is "vendor".
Updatetime	"updatetime"	"string"	date-time	N/A	RW	Yes	Scheduled time, according to IETF RFC 3339, to do action which is specified in the "swupdateaction" Property.

424

425 The values of the "swupdatestate" Property are described in Table 12.

426 **Table 12 State definitions and state transitions of software update Resource**

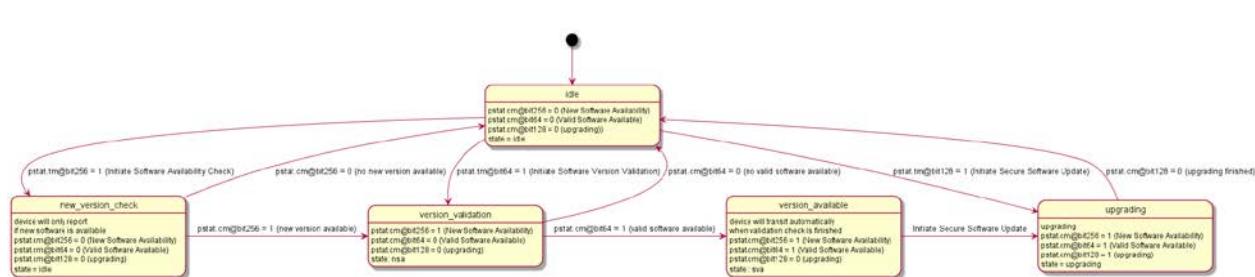

Description	Value of Property "swupdatestate"	equivalent "cm" bit values in "pstat".	Transition allowed from state
Idle, waiting for updates	"idle"	Bit 64 = 0 Bit 128 = 0 Bit 256 = 0	"nsa", "svv", "sva", "upgrading"
New software available (after checking for new software being available on the url indicated by "purl"). This step does not download the new software	"nsa"	Bit 64 = 0 Bit 128 = 0 Bit 256 = 1	"idle", "svv", "sva", "upgrading"
Software version validation (during downloading and checking the software integrity)	"svv"	Bit 64 = 0 Bit 128 = 0 Bit 256 = 1	"idle", "nsa", "sva", "upgrading"

Software version available (The software is downloaded and deemed to be valid)	"sva"	Bit 64 = 1 Bit 128 = 0 Bit 256 = 1	"idle", "nsa", "svv", "upgrading"
Upgrading	"upgrading"	Bit 64 = 1 Bit 128 = 1 Bit 256 = 1	"idle", "nsa", "svv", "sva"

The typical state transitions are described by Figure 3. The state transitions can be triggered manually or by a timed action. The manual state triggers (i.e., "tm" Property of "oic.r.pstat") are described in ISO/IEC 30118-2:2018 clause 13.8. The timed state triggers are managed using the "swupdateaction" and "updatetime" Properties of the software update Resource to trigger software update actions at some future date and time. The action names for scheduled actions are listed in Table 13. When the "updatetime" for the timed action is in the past then the update shall not take place, it is implementation dependent if the UPDATE with an "updatetime" value in the past will give an error on the UPDATE operation.

**Table 13 Value definitions for the Property "swupdateaction"**

Description	Value of Property "swupdateaction", for scheduled update actions.	Action taken	Equivalent "pstat" "tm" bits.
Nothing scheduled (not applicable).	"idle"	No action	
Initiate software availability check.	"isac"	Check on remote end point if a newer software version is available.	"tm" bit 256.
Initiate software versionValidation.	"isvv"	Downloads and verifies if the software version is valid.	"tm" bit 64.
Initiate secure software update.	"upgrade"	Upgrades the software in the Device. It uses the downloaded and validated software package. If no validated software package is available on the Device, the Device takes the necessary steps to obtain a validated software package, by downloading and verifying the software from the external source.	"tm" bit 128.

**Figure 3 – Typical state transitioning diagram for software update**

The "purl" Property indicates the URL to obtain the software package from. This URL shall be a fully qualified URL. If the value is an empty string ("") then the Device will use the built in vendor defined URL (see ISO/IEC 30118-2:2018). If a built in URL is not implemented, setting the "purl" Property value to an empty string will result in an error code value of 6 as defined in Table 14.

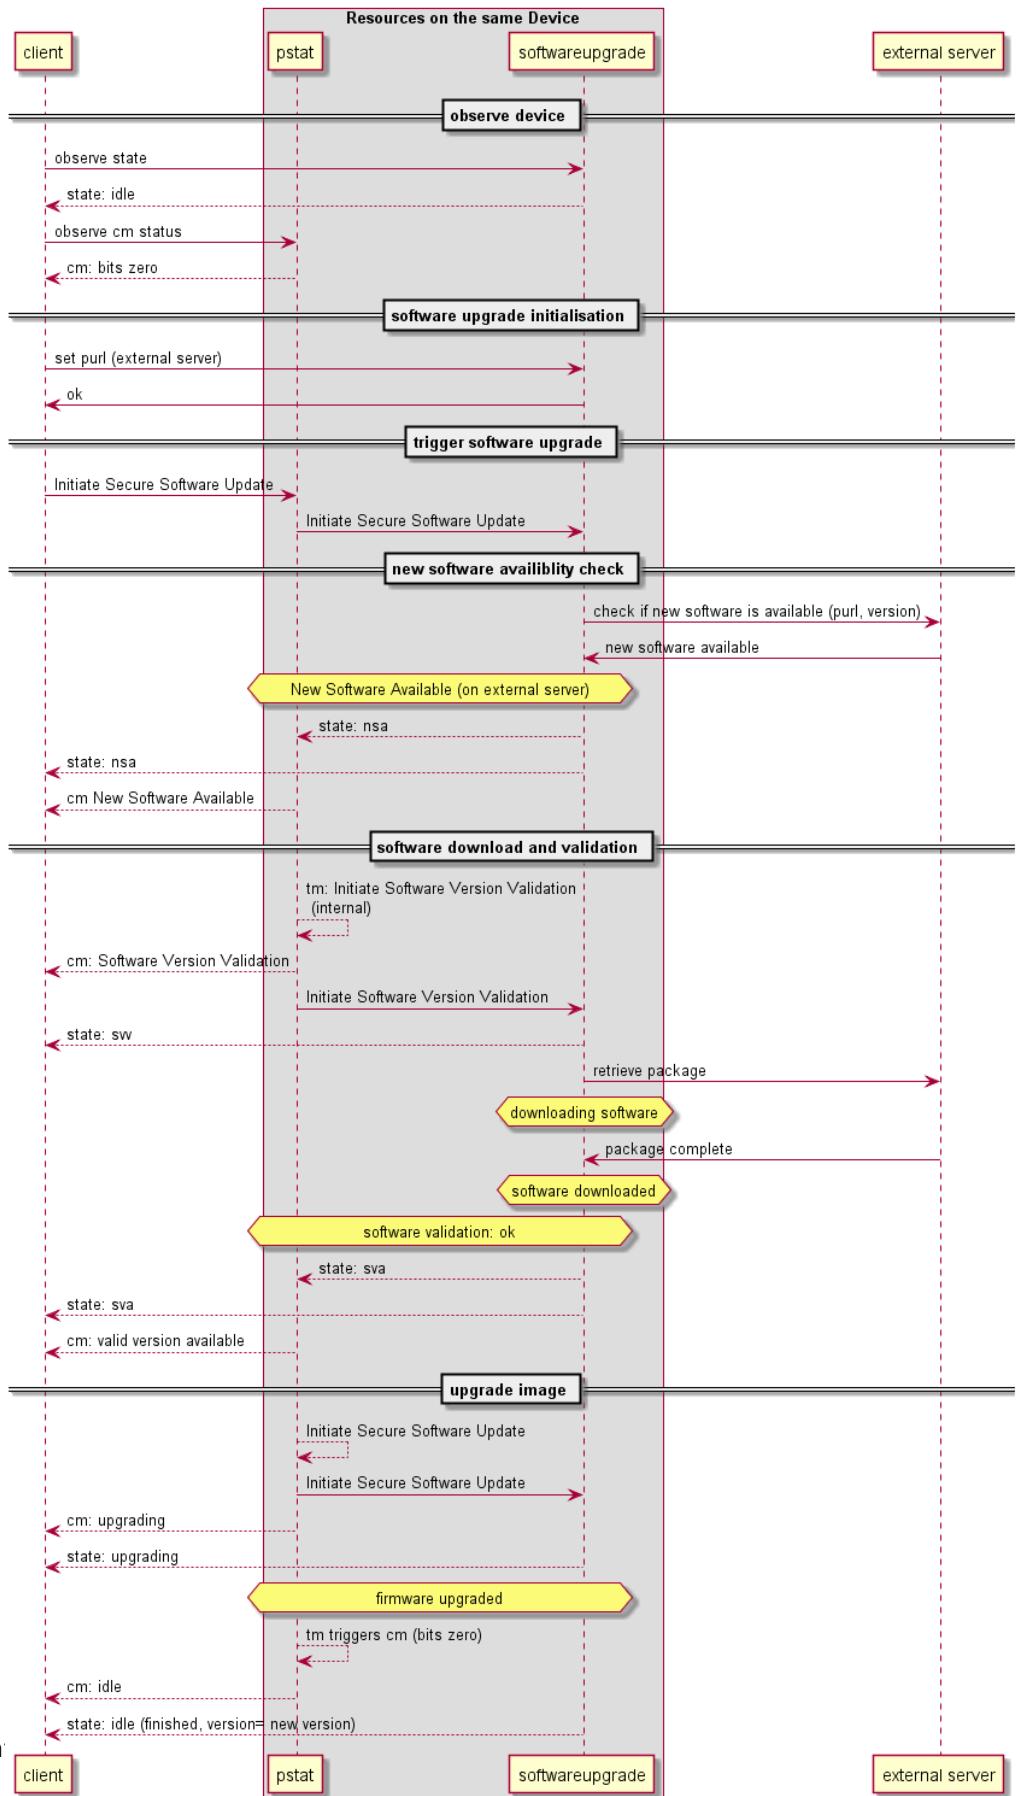

443

**Table 14 List of codes of the "swupdateresult" Property.**

Description	code
Idle.	0
Success, everything went well.	1
Not enough RAM.	2
Not enough Flash.	3
Connection lost.	4
Software validation failure.	5
Invalid URL to receive the software package.	6
Unsupported protocol for download URL.	7
Firmware update failed.	8
Software transport error codes. HTTP result codes when accessing the URL to download the software package.	400-600

444

445 Figure 4 depicts a typical update scenario. This scenario is using the observability of "pstat", so  
 446 that the Client is informed on the changes of the "cm" bit value to track the progress.

448                   **Figure 4 – Typical sequence for none scheduled upgrading software**

449                   **5.4 Scenes**

450                   **5.4.1 Introduction**

451                   Scenes are a mechanism for automating certain operations.

452                   A Scene is a static entity that stores a set of defined Property values for a Collection of Resources.  
453                   Scenes provide a mechanism to store a setting over multiple Resources that may be hosted by  
454                   multiple separate Servers. Scenes, once set up, can be used by multiple Clients to recall a setup.

455                   Scenes can be grouped and reused, a group of Scenes is also a Scene.

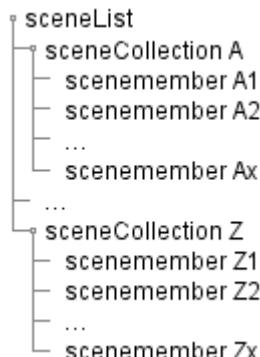

456                   In short, Scenes are bundled user settings.

457                   **5.4.2 Scenes Resource model**

458                   **5.4.2.1 Introduction**

459                   Scenes are described by means of Resources. The Scene Resources are hosted by a Server and  
460                   the top level Resource is listed in "/oic/res". This means that a Client can determine if the Scene  
461                   functionality is hosted on a Server via Resource discovery as defined in clause 11.2 in  
462                   ISO/IEC 30118-1:2018. The setup of Scenes is driven by Client interactions. This includes creating  
463                   new Scenes, and mappings of Server Properties that are part of a Scene.

464                   The Scene functionality is created by multiple Resources and has the structure depicted in Figure 5.  
465                   The sceneList and sceneCollection Resources are overloaded Collection Resources. The  
466                   sceneCollection Resource contains a list of Scenes. This list contains zero or more Scenes. The  
467                   sceneMember Resource contains the mapping between a Scene and what needs to happen  
468                   according to that Scene on an indicated Resource.

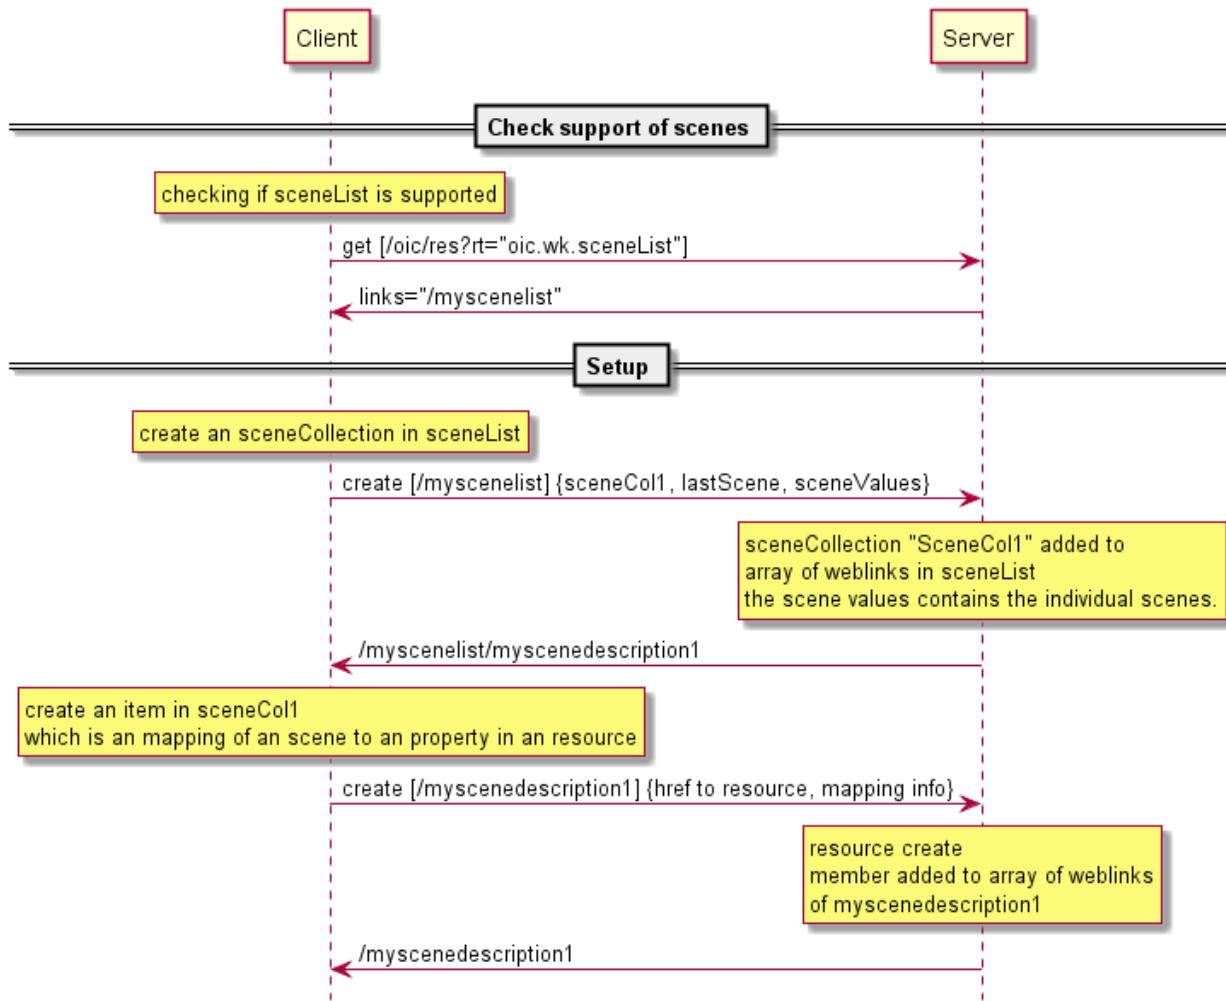

469

470                   **Figure 5 – Generic Scene Resource structure**

471                   **5.4.2.2 Scene creation**

472                   A Client desiring to interact with Scenes needs to first determine if the Server supports the Scene  
473                   feature; the sceneMembers of a Scene that are Resources of end Device being updated by the  
474                   Scene change do not have to be co-located on the Server supporting the Scene feature. This can  
475                   be done by checking if "/oic/res" contains the "rt" of the sceneList Resource. This is depicted in  
476                   first steps of Figure 6. The sceneCollection Resource is created by the Server using some out of  
477                   bound mechanism, Client creation of Scenes is not supported at this time. This will entail defining  
478                   the Scene with an applicable list of Scene Values and the mappings for each Resource being part  
479                   of the Scene. The mapping for each Resource being part of the sceneCollection Resource is  
480                   described by a Resource called sceneMember. The sceneMember Resource contains the link to a

481 Resource and the mapping between the Scene listed in the "sceneValues" Property and the actual  
482 Property value of the Resource indicated by the Link.

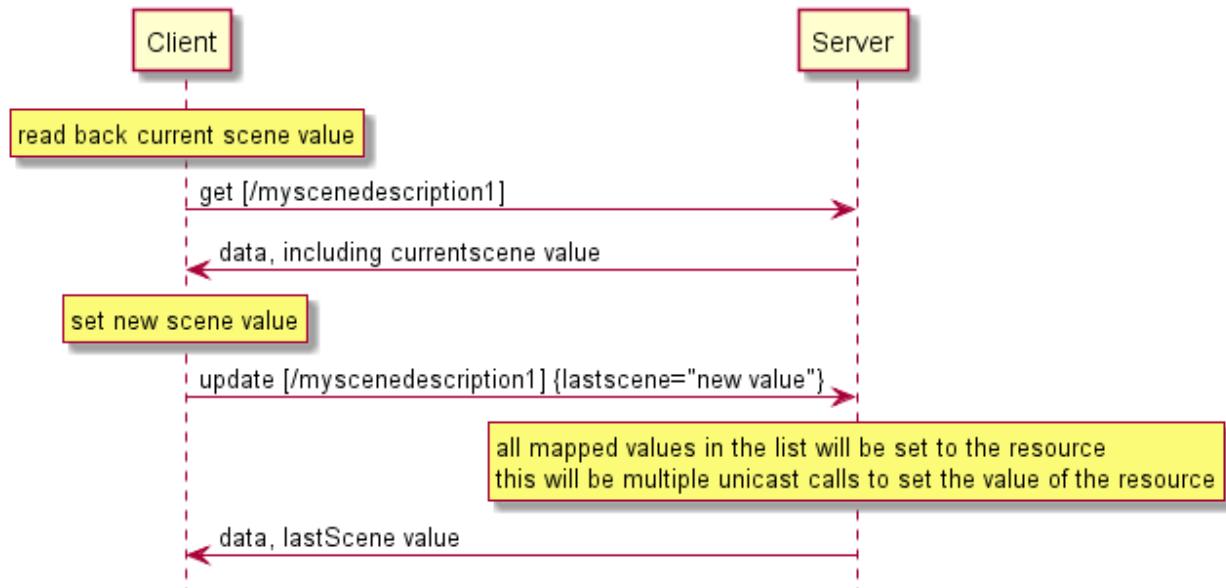

483  
484 **Figure 6 – Interactions to check Scene support and setup of specific Scenes**

#### 485 **5.4.2.3 Interacting with Scenes**

486 All capable Clients can interact with Scenes. The allowed Scene Values and the last applied Scene  
487 Value can be retrieved from the Server hosting the Scene. The Scene Value shall be changed by  
488 issuing an UPDATE operation with a payload that sets the "lastScene" Property to one of the listed  
489 allowed Scene Values. These steps are depicted in Figure 7. Note that the "lastScene" Property  
490 value does not imply that the current state of all Resources that are part of the Scene will be at the  
491 mapped value. This is due to that the setting the Scene Values are not modelled as actual states  
492 of the system. This means that another Client can change just one Resource being part of the  
493 Scene without having feedback that the state of the Scene is changed.

494

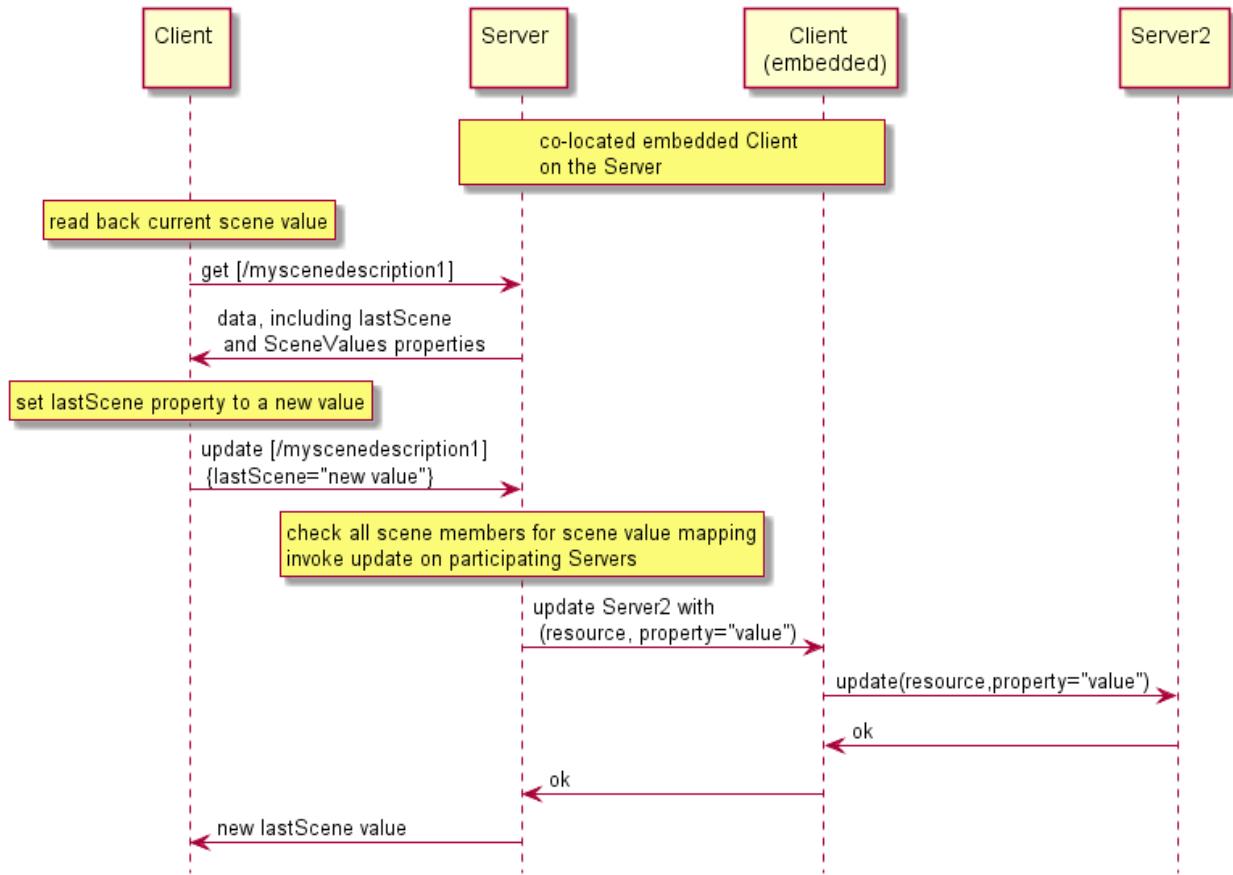

495

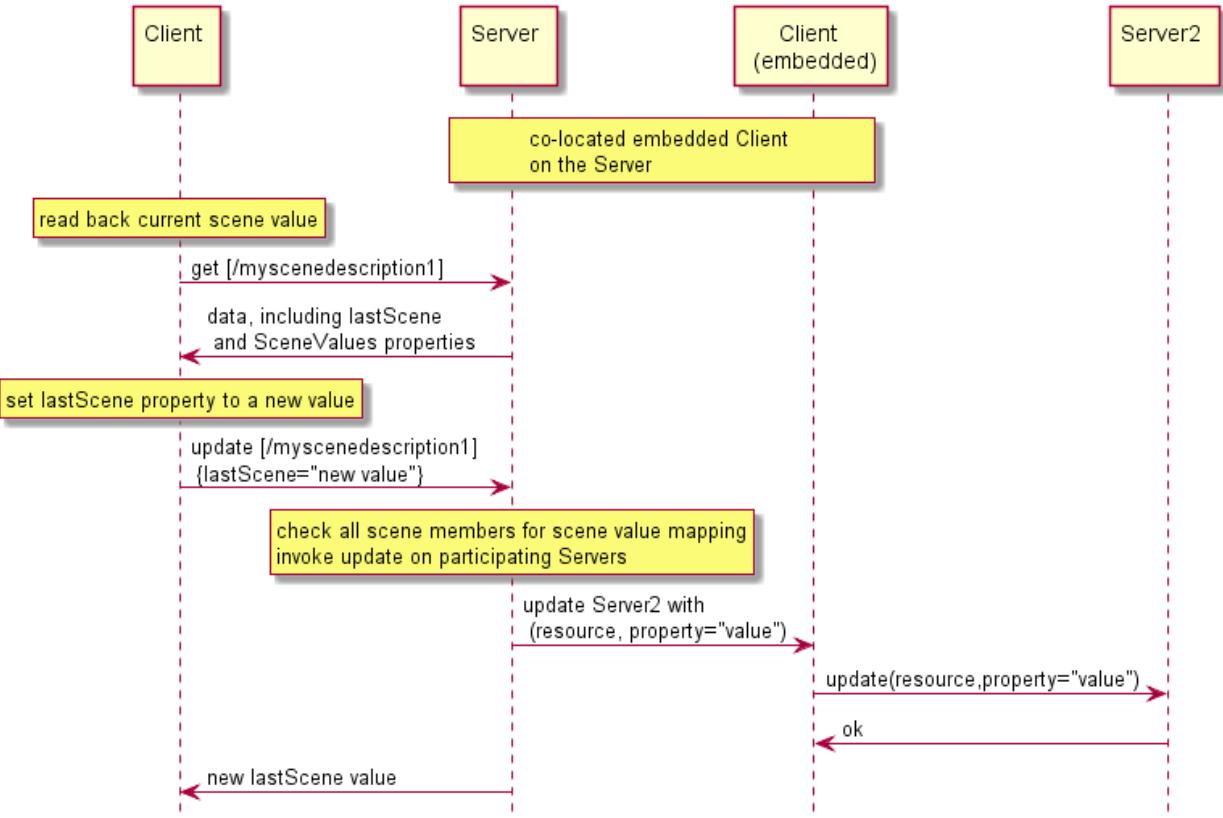

496

**Figure 7 – Client interactions on a specific Scene**

497 As described previously, a Scene can reference one or more Resources (i.e., sceneMembers) that  
 498 are present on one or more Servers. The Scene Members are re-evaluated each time a Scene  
 499 change takes place. This evaluation is triggered by a Client that is either embedded as part of the  
 500 Server hosting the Scene, or separate to the Server having knowledge of the Scene via a  
 501 RETRIEVE operation, Observing the referenced Resources using the mechanism described in  
 502 clause 11.3.2 in ISO/IEC 30118-1:2018. The embedded Client located in the same Device with the  
 503 Server is a general Client but interacts only with Scene functionalities. During the evaluation the  
 504 mappings for the new Scene Value will be applied to the Servers which contain sceneMembers  
 505 from the Scene that is being updated. This behaviour is depicted in Figure 8.

506

507

508

**Figure 8 – Interaction overview due to a Scene change****5.4.2.4 Summary of Resource Types defined for Scene functionality**

Table 15 summarizes the list of Resource Types that are part of Scenes.

511

**Table 15 – list of Resource Types for Scenes**

Friendly Name (informative)	Resource Type (rt)	Short Description	Clause
sceneList	"oic.wk.scenelist"	Top Level Collection containing sceneCollections	N/A
sceneCollection	"oic.wk.scenecollection"	Description of zero or more scenes	N/A
sceneMember	"oic.wk.scenemember"	Description of mappings for each specific Resource part of the sceneCollection	N/A

512

**5.4.3 Security considerations**

Creation of Scenes on a Server that is capable of this functionality is dependent on the ACLs applied to the Resources and the Client having the appropriate permissions. Interaction between a Client (embedded or separate) and a Server that hosts the Resource that is referenced as a Scene Member is contingent on the Client having appropriate permissions to access the Resource on the host Server.

519 See ISO/IEC 30118-2:2018 for details on the use of ACLs and also the mechanisms around Device  
520 Authentication that are necessary to ensure that the correct permissions exist for the Client to  
521 access the Scene Member Resource(s) on the Server.

## 522 **5.5 Icons**

### 523 **5.5.1 Overview**

524 Icons are a primitive that are needed by various OCF subsystems, such as bridging. An optional  
525 Resource Type of "oic.r.icon" has been defined to provide a common representation of an icon  
526 Resource that can be used by Devices.

### 527 **5.5.2 Resource**

528 The icon Resource is as defined in Table 16.

529 **Table 16 – Optional Icon Core Resource**

Example URI	Resource Type Title	Resource Type ID ("rt" value)	OCF Interfaces	Description	Related Functional Interaction
"/example/oic/icon"	Icon	"oic.r.icon"	"oic.if.r"	The Resource through which the Device can obtain icon images. The Properties exposed by "/example/oic/mnt" are listed in Table 17.	Icon

530  
531 Table 17 defines the details for the "oic.r.icon" Resource Type.

532 **Table 17 – "oic.r.icon" Resource Type definition**

Property title	Property name	Value type	Value rule	Unit	Access mode	Mandatory	Description
<b>Mime Type</b>	"mimetype"	"string"	N/A	N/A	R	Yes	Specifies the format (media type) of the icon. It should be a template string as specified in IANA Media Types Assignment
<b>Width</b>	"width"	"integer"	$\geq 1$	pixels	R	Yes	Width of the icon in pixels greater than or equal to 1.
<b>Height</b>	"height"	"integer"	$\geq 1$	pixels	R	Yes	Height of the icon in pixels greater than or equal to 1.
<b>Icon</b>	"media"	"uri"	N/A	N/A	R	Yes	URI to the location of the icon image.

533  
534 **5.6 Alerts**  
535 **5.6.1 Overview**  
536 Alerts provide a means by which a Device provides information to an interested party with regard  
537 to error or other conditions that the Device is experiencing. An Alert contains human readable text  
538 that is dependent on the Device itself and the condition being reported. A Device may expose  
539 discrete instances of an Alert Resource Type ("oic.r.alert") or may also expose Alerts within an  
540 Alert Collection ("oic.r.alertcollection"). If the instance of "oic.r.alertcollection" is Observable (see  
541 clause 7.8.2.2 in ISO/IEC 30118-1:2018) then a Client may Observe the Collection using the

542 mechanisms defined in clause 11.3 in ISO/IEC 30118-1:2018. As the Device adds and removes  
 543 Alerts from the Collection notifications may be generated for any registered Observers, the format  
 544 of which is dependent upon the OCF Interface used for the initial Observe, see clause 7.6.3 in  
 545 ISO/IEC 30118-1:2018.

## 546 5.6.2 Resource Types

547 The Alert and Alert Collection Resource Types are as defined in Table 18.

548 **Table 18 – Optional Alert Core Resources**

Example URI	Resource Type Title	Resource Type ID ("rt" value)	Interfaces	Description	Related Functional Interaction
"/example/alertURI"	Alert	"oic.r.alert"	"oic.if.r", "oic.if.baseline"	The Resource through which the Device exposes Alerts.  The Properties exposed by "oic.r.alert" are listed in Table 19.	Alerts
"/example/alertcollectionURI"	Alert Collection	"oic.r.alertcollection"	"oic.if.ll", "oic.if.b", "oic.if.baseline"	A specialisation of a Collection that contains only instances of "oic.r.alert" that may be Observed by a Client in order to consume Alerts as they are created by the Device.	Alerts

549

550 Table 19 defines the details for the "oic.r.alert" Resource Type.

551 **Table 19 – "oic.r.alert" Resource Type definition**

Property title	Property name	Value type	Value rule	Unit	Access mode	Mandatory	Description
Category	"category"	"string"			R	Yes	Device defined category for the Alert (e.g. "System", "I/O")
Generated Time	"generatedtime"	"date-time"			R	Yes	IETF RFC 3339 formatted time at which the Alert was generated.
Originator ID	"originatorid"	"string"			R	Yes	Identity of the originator of the Alert. May be the Device ID of the Device or some other Device defined identity.
Severity	"severity"	"integer"	[0,7]		R	Yes	IETF RFC 5424 defined severity value
Subject	"subject"	"array"			R	No	Human-friendly subject of the Alert in one or more languages. This Property is an array of objects where each object has a "language" field (containing an IETF RFC 5646 language tag) and a "value" field containing the subject of the Alert name in the indicated language.
Account ID	"accounted"	"string"			R	No	Identity of the account with which the Device

						generating this Alert is associated.
--	--	--	--	--	--	--------------------------------------

552

553 The Alert Collection ("oic.r.alertcollection") Resource Type defines no Properties additional to  
 554 those defined for all instances of a Collection in Table 13 of ISO/IEC 30118-1:2018. However the  
 555 Alert Collection does impose restrictions of the values that shall be populated in the "rt" and "rts"  
 556 Properties. These are described in Table 20.

557 **Table 20 – "oic.r.alertcollection" Resource Type definition**

Property title	Property name	Value type	Value rule	Unit	Access mode	Mandatory	Description
Links	"links"	"array"	See Table 13 in ISO/IEC 30118-1:2018		R	Yes	See Table 13 in ISO/IEC 3011 8-1:2018.
Resource Type	"rt"	"array"	["oic.r.alertcollection"]		R	Yes	See Table 4 in ISO/IEC 3011 8-1:2018.
Resource Types	"rts"	"array"	["oic.r.alert"] or ["oic.r.alert", "oic.r.value.conditional"]		R	Yes	See Table 11 in ISO/IEC 3011 8-1:2018.

558

559 **5.6.3 Example of Use**

560 Consider a Device that is capable of generating Alerts; it exposes an empty instance of an Alert  
 561 Collection ("oic.r.alertcollection"); that is the array of Links (the "links" Property) contains no items.

562 As the Device under whatever conditions generates Alerts, the Device adds a Link to the Alert  
 563 Resource in the instance of an Alert Collection. A Client that has discovered the Device and is  
 564 Observing the Alert Collection using the links list OCF Interface ("oic.if.ll") will receive a notification  
 565 containing the complete Alert Collection (not just any Links that were added). It is the responsibility  
 566 of the Client to determine which Links were added (or removed if the Alert was removed); noting  
 567 that the "generatedtime" Property may be used to determine the generated order. The Client then  
 568 retrieves the Alert itself via a RETRIEVE to the "href" Link Parameter in the newly added Link to  
 569 the Collection.

570 See A.10 for an example of an Alert Resource and the applicable schema.

571  
572  
573  
574

## Annex A (normative)

### Resource Type definitions

575

#### A.1 List of Resource Type definitions

576 All the clauses in Annex A describe the Resource Types with a RESTful API definition language.  
577 The Resource Type definitions presented in Annex A are formatted for readability, and so may  
578 appear to have extra line breaks. Table A-1 contains the list of defined Core Common Resources  
579 in this document.

580

**Table A-1 – Alphabetized list of Core Resources**

Friendly Name (informative)	Resource Type (rt)	Clause
Alerts	"oic.r.alert"	A.10
Alerts Collection	"oic.r.alertcollection"	A.11
Device Configuration	"oic.wk.con"	A.2
Platform Configuration	"oic.wk.con.p"	A.3
Icon	"oic.r.icon"	A.4
Maintenance	"oic.wk.mnt"	A.5
Network Monitoring	"oic.wk.nmon"	A.6
Scenes (Top Level)	"oic.wk.scenelist"	A.7
Scenes Collections	"oic.wk.scenecollection"	A.8
Scene Member	"oic.wk.scenemember"	A.9
Software Update	"oic.r.softwareupdate"	A.12

581

#### A.2 Device Configuration

##### A.2.1 Introduction

582 Resource that allows for Device specific information to be configured.  
583

##### A.2.2 Example URI

584 /exampleDeviceConfigurationResURI

##### A.2.3 Resource type

585 The Resource Type is defined as: "oic.wk.con".

##### A.2.4 OpenAPI 2.0 definition

## 898     **A.2.5    Property definition**

899   Table A-2 defines the Properties that are part of the "oic.wk.con" Resource Type.

900   **Table A-2 – The Property definitions of the Resource with type "rt" = "oic.wk.con".**

<b>Property name</b>	<b>Value type</b>	<b>Mandatory</b>	<b>Access mode</b>	<b>Description</b>
rt	array: see schema	No	Read Only	Resource Type of the Resource.
loc	array: see schema	No	Read Write	Location information (lat, long).
c	string	No	Read Write	Currency.
ln	array: see schema	No	Read Write	Localized names.
locn	string	No	Read Write	Human Friendly Name for location.
dl	multiple types: see schema	No	Read Write	
n	multiple types: see schema	Yes	Read Write	
id	multiple types: see schema	No	Read Write	
r	string	No	Read Write	Region.
if	array: see schema	No	Read Only	The OCF Interfaces supported by this Resource.
loc	array: see schema	No	Read Write	Location information (lat, long).
c	string	No	Read Write	Currency.
ln	array: see schema	No	Read Write	Localized names.
locn	string	No	Read Write	Human Friendly Name for location.
dl	multiple types: see schema	No	Read Write	
n	string	Yes	Read Write	The human friendly name to be set on the Resource, this is also reflected in the same Property in oic.wk.d.
r	string	No	Read Write	Region.

## 901     **A.2.6    CRUDN behaviour**

902   Table A-3 defines the CRUDN operations that are supported on the "oic.wk.con" Resource Type.

**Table A-3 – The CRUDN operations of the Resource with type "rt" = "oic.wk.con".**

Create	Read	Update	Delete	Notify

### A.3 Platform Configuration

### A.3.1 Introduction

Resource that allows for Platform specific information to be configured.

### A.3.2 Example URI

/examplePlatformConfigurationResURI

### A.3.3 Resource type

The Resource Type is defined as: "oic.wk.con.p".

#### A.3.4 OpenAPI 2.0 definition

### 1115 A.3.5 Property definition

1116 Table A-4 defines the Properties that are part of the "oic.wk.con.p" Resource Type.

1117 **Table A-4 – The Property definitions of the Resource with type "rt" = "oic.wk.con.p".**

Property name	Value type	Mandatory	Access mode	Description
rt	array: see schema		Read Only	Resource Type of the Resource.
n	multiple types: see schema		Read Write	
mnpn	array: see schema		Read Write	Platform names.
id	multiple types: see schema		Read Write	
if	array: see schema		Read Only	The OCF Interfaces supported by this Resource.
n	string	Yes	Read Write	The human friendly name to be set on the Resource, this is also reflected in the same Property in oic.wk.p.
mnpn	array: see schema	No	Read Write	Platform names.

### 1118 A.3.6 CRUDN behaviour

1119 Table A-5 defines the CRUDN operations that are supported on the "oic.wk.con.p" Resource Type.

1120 **Table A-5 – The CRUDN operations of the Resource with type "rt" = "oic.wk.con.p".**

Create	Read	Update	Delete	Notify
	get	post		observe

## 1121 A.4 Icon

### 1122 A.4.1 Introduction

1123 This Resource describes the attributes associated with an Icon.  
 1124

```

1125 A.4.2 Example URI
1126 /IconResURI

1127 A.4.3 Resource type
1128 The Resource Type is defined as: "oic.r.icon".

1129 A.4.4 OpenAPI 2.0 definition

#### 1258 A.4.5 Property definition

1259 Table A-6 defines the Properties that are part of the "oic.r.icon" Resource Type.

1260

**Table A-6 – The Property definitions of the Resource with type "rt" = "oic.r.icon".**

Property name	Value type	Mandatory	Access mode	Description
mimetype	string	Yes	Read Only	The Media Type of the icon.
rt	array: see schema	No	Read Only	Resource Type of the Resource.
media	string	Yes	Read Only	Specifies the URI to the icon.
n	multiple types: see schema	No	Read Write	
id	multiple types: see schema	No	Read Write	
width	integer	Yes	Read Only	The width in pixels.
height	integer	Yes	Read Only	The height in pixels.
if	array: see schema	No	Read Only	The OCF Interfaces supported by this Resource.

**A.4.6 CRUDN behaviour**

1262 Table A-7 defines the CRUDN operations that are supported on the "oic.r.icon" Resource Type.

**Table A-7 – The CRUDN operations of the Resource with type "rt" = "oic.r.icon".**

Create	Read	Update	Delete	Notify
	get			observe

**A.5 Maintenance****A.5.1 Introduction**

1266 The Resource through which a Device is maintained and can be used for diagnostic purposes.  
 1267 fr (Factory Reset) is a boolean.  
 1268 The value 0 means No action (Default), the value 1 means Start Factory Reset  
 1269 After factory reset, this value shall be changed back to the default value  
 1270 rb (Reboot) is a boolean.  
 1271 The value 0 means No action (Default), the value 1 means Start Reboot  
 1272 After Reboot, this value shall be changed back to the default value  
 1273

**A.5.2 Well-known URI**

1275 /oic/mnt

**A.5.3 Resource type**

1277 The Resource Type is defined as: "oic.wk.mnt".

**A.5.4 OpenAPI 2.0 definition**

## A.6.5 Property definition

Table A-10 defines the Properties that are part of the "oic.wk.nmon" Resource Type.

**Table A-10 – The Property definitions of the Resource with type "rt" = "oic.wk.nmon".**

Property name	Value type	Mandatory	Access mode	Description
amstx	integer	No	Read Only	Average transmitted message size in bytes (tx) in the collection period
reset	boolean	Yes	Read Write	True: reset the collected values
mmsrx	integer	No	Read Only	Maximum received message size in bytes (rx) in the collection period
mmstx	integer	No	Read Only	Maximum transmitted message size in bytes (tx) in the collection period
tx	integer	No	Read Only	Amount of transmitted kilo bytes from the collection
rt	array: see schema	No	Read Only	Resource Type of the Resource
ianaifType	integer	Yes	Read Only	The type of the network connection, as defined by iana <a href="https://www.iana.org/assignments/ianaiftype-mib/ianaiftype-mib">https://www.iana.org/assignments/ianaiftype-mib/ianaiftype-mib</a>
rx	integer	No	Read Only	Amount of received kilobytes from the collection
id	multiple types: see schema	No	Read Write	
amsrx	integer	No	Read Only	Average received message size in bytes (rx) in the collection period
n	multiple types: see schema	No	Read Write	
col	boolean	Yes	Read Write	True: Device is collecting values
if	array: see schema	No	Read Only	The OCF Interfaces supported by this Resource
reset	boolean	Yes	Read Write	True: reset the collected values

n	multiple types: see schema	No	Read Write	
col	boolean	Yes	Read Write	True: Device is collecting values

### A.6.6 CRUDN behaviour

Table A-11 defines the CRUDN operations that are supported on the "oic.wk.nmon" Resource Type.

**Table A-11 – The CRUDN operations of the Resource with type "rt" = "oic.wk.nmon".**

Create	Read	Update	Delete	Notify
	get	post		observe

## A.7 Scene List

### A.7.1 Introduction

Toplevel This The Resource rts value is contains a generic oic.wk.scenecollection Scene Collection Resource Resource. Resource. Types.

### A.7.2 Example URI

/SceneListResURI

### A.7.3 Resource type

1701 The Resource Type is defined as: "oic.wk.scenelist".

#### A.7.4 OpenAPI 2.0 definition

#### 1946 A.7.5 Property definition

1947 Table A-12 defines the Properties that are part of the "oic.wk.scenelist" Resource Type.

**Table A-12 – The Property definitions of the Resource with type "rt" = "oic.wk.scenelist".**

<b>Property name</b>	<b>Value type</b>	<b>Mandatory</b>	<b>Access mode</b>	<b>Description</b>
links	array: see schema	Yes	Read Write	A set of simple or individual OCF Links.
n	multiple types: see schema	No	Read Write	
id	multiple types: see schema	No	Read Write	
if	array: see schema	Yes	Read Only	The OCF Interfaces supported by this Resource.
rts	array: see schema	No	Read Only	The list of allowable Resource Types in Links included in the Collection.
rt	array: see schema	Yes	Read Only	Resource Type of the Resource.
if	array: see schema	Yes	Read Only	The OCF Interfaces supported by the Linked Resource.
rt	array: see schema	Yes	Read Only	The Resource Type of the Linked Resource.
anchor	multiple types: see schema	No	Read Write	
di	multiple types: see schema	No	Read Write	
eps	multiple types: see schema	No	Read Write	
href	multiple types: see schema	Yes	Read Write	
ins	multiple types: see schema	No	Read Write	
p	multiple types: see schema	No	Read Write	
rel	multiple types: see schema	No	Read Write	
title	multiple types: see schema	No	Read Write	
type	multiple types: see schema	No	Read Write	

**A.7.6 CRUDN behaviour**

Table A-13 defines the CRUDN operations that are supported on the "oic.wk.scenelist" Resource Type.

1952

**Table A-13 – The CRUDN operations of the Resource with type "rt" = "oic.wk.scenelist".**

## A.8 Scene Collection

1954

### A.8.1 Introduction

1955

Collection that models a set of Scenes. This Resource is a generic Collection Resource with additional Properties. The rts value contains oic.scenemember Resource Types. The additional Properties are lastScene, this is the Scene Value last set by any Client sceneValues, this is the list of available Scenes lastScene shall be listed in sceneValues.

1956

1963

### A.8.2 Example URI

1964

/SceneCollectionResURI

1965

### A.8.3 Resource type

1966

The Resource Type is defined as: "oic.wk.scenecollection".

1967

### A.8.4 OpenAPI 2.0 definition

1968

## 2269 A.8.5 Property definition

2270 Table A-14 defines the Properties that are part of the "oic.wk.scenecollection" Resource Type.

2271 **Table A-14 – The Property definitions of the Resource with type "rt" =**  
2272 **"oic.wk.scenecollection".**

Property name	Value type	Mandatory	Access mode	Description
rt	array: see schema		Read Only	Resource Type of the Resource.
lastScene	string		Read Write	Last selected Scene from the set of sceneValues.
links	array: see schema		Read Write	A set of simple or individual OCF Links.

sceneValues	array: see schema		Read Only	All available Scene Values.
n	multiple types: see schema		Read Write	
id	multiple types: see schema		Read Write	
rts	array: see schema		Read Only	Resource Type of the Resources within the Collection.
if	array: see schema		Read Only	The OCF Interfaces supported by this Resource.
lastScene	string		Read Write	Last selected Scene from the set of sceneValues.
if	array: see schema	Yes	Read Only	The OCF Interfaces supported by the Linked Resource.
rt	array: see schema	Yes	Read Only	Resource Type of the Linked Resource.
anchor	multiple types: see schema	No	Read Write	
di	multiple types: see schema	No	Read Write	
eps	multiple types: see schema	No	Read Write	
href	multiple types: see schema	Yes	Read Write	
ins	multiple types: see schema	No	Read Write	
p	multiple types: see schema	No	Read Write	
rel	multiple types: see schema	No	Read Write

#### 2546      A.10 Alert

##### 2547      A.10.1 Introduction

2548      This Resource provides a mechanism for a Server to expose information to an  
 2549      interested party with regard to error or other conditions that the Device is experiencing (Alerts).  
 2550      category is a string that contains the Device defined category for the Alert.  
 2551      timestamp is an RFC3339 formatted time at which the Alert was generated.

2552 originatorid is a string that contains the identity of the originator of the Alert.  
2553 severity is an integer that contains the RFC5424 defined severity of the Alert.  
2554 subject is an array containing human readable text in one or more languages.  
2555 accountid is a string containing the identity of the account with which the Device is associated.  
2556

2557 **A.10.2 Example URI**

2558 /AlertResURI

2559 **A.10.3 Resource type**

2560 The Resource Type is defined as: "oic.r.alert".

2561 **A.10.4 OpenAPI 2.0 definition**

### 2728 A.10.5 Property definition

2729 Table A-18 defines the Properties that are part of the "oic.r.alert" Resource Type.

2730 **Table A-18 – The Property definitions of the Resource with type "rt" = "oic.r.alert".**

Property name	Value type	Mandatory	Access mode	Description
category	string	Yes	Read Only	Category into which the notification is classified.
rt	array: see schema	No	Read Only	Resource Type.
severity	integer	Yes	Read Only	RFC 5424 severity of the alert.
timestamp	string	Yes	Read Only	An RFC3339 formated time indicating when the data was observed (e.g.: 2016-02-15T09:19Z,

				1996-12-19T16:39:57-08:00).
subject	array: see schema	No	Read Only	Alert subject matter.
originatorid	string	Yes	Read Only	ID of the creator of the event.
n	multiple types: see schema	No	Read Write	
id	multiple types: see schema	No	Read Write	
accountid	string	No	Read Only	ID of the account.
if	array: see schema	No	Read Only	The OCF Interfaces supported by this Resource.

2731 **A.10.6 CRUDN behaviour**

2732 Table A-19 defines the CRUDN operations that are supported on the "oic.r.alert" Resource Type.

2733 **Table A-19 – The CRUDN operations of the Resource with type "rt" = "oic.r.alert".**

Create	Read	Update	Delete	Notify
	get			observe

2734 **A.11 Alert Collection**

2735 **A.11.1 Introduction**

2736 This Resource is a Collection containing instances of Alerts (oic.r.alert).  
 2737 This is the response using the baseline interface.  
 2738

2739 **A.11.2 Example URI**

2740 /AlertCollectionResURI

2741 **A.11.3 Resource type**

2742 The Resource Type is defined as: "oic.r.alertcollection".

2743 **A.11.4 OpenAPI 2.0 definition**

### 3043 A.11.5 Property definition

3044 Table A-20 defines the Properties that are part of the "oic.r.alertcollection" Resource Type.

3045  
3046

**Table A-20 – The Property definitions of the Resource with type "rt" = "oic.r.alertcollection".**

Property name	Value type	Mandatory	Access mode	Description
href	multiple types: see schema	Yes	Read Write	
rep	multiple types: see schema	Yes	Read Write	
n	multiple types: see schema	No	Read Write	
id	multiple types: see schema	No	Read Write	
rt	array: see schema	Yes	Read Only	
rts	array: see schema	Yes	Read Only	
if	array: see schema	Yes	Read Only	The OCF Interfaces supported by this Resource.
links	array: see schema	Yes	Read Write	A set of simple or individual Links.
anchor	multiple types: see schema	No	Read Write	
di	multiple types: see schema	No	Read Write	
eps	multiple types: see schema	No	Read Write	
href	multiple types: see schema	Yes	Read Write	
ins	multiple types: see schema	No	Read Write	
p	multiple types: see schema	No	Read Write	
rel	multiple types: see schema	No	Read Write	
title	multiple types: see schema	No	Read Write	
type	multiple types: see schema	No	Read Write	
if	array: see schema	Yes	Read Only	The OCF Interfaces supported by the target Resource.
rt	array: see schema	Yes	Read Only	Resource Type of the target Resource.

3047

#### A.11.6 CRUDN behaviour

3048  
3049

Table A-21 defines the CRUDN operations that are supported on the "oic.r.alertcollection" Resource Type.

3050

**Table A-21 – The CRUDN operations of the Resource with type "rt" = "oic.r.alertcollection".**

Create	Read	Update	Delete	Notify

### 3274 A.12.5 Property definition

3275 Table A-22 defines the Properties that are part of the "oic.r.softwareupdate" Resource Type.

3276 **Table A-22 – The Property definitions of the Resource with type "rt" =**  
3277 **"oic.r.softwareupdate".**

Property name	Value type	Mandatory	Access mode	Description
rt	array: see schema	No	Read Only	
nv	string	No	Read Only	New available Software version
purl	string	Yes	Read Write	Source of the software package, might be a HTTPS or CoAPs URL
swupdateaction	string	Yes	Read Write	Scheduled action to do a software update
swupdatestate	string	Yes	Read Only	State of the software update
swupdateresult	integer	Yes	Read Only	Result of the software update, list of result codes
lastupdate	string	No	Read Only	Time of the last software update (in RFC3339 format), Initial set on date of manufacturing
signed	string	No	Read Only	Signage method of the software package, currently the only allowed value is 'vendor'.
updatetime	string	Yes	Read Write	Scheduled time (in RFC3339 format) to do action which is specified in 'swupdateaction' Property.
n	multiple types: see schema	No	Read Write	
id	multiple types: see schema	No	Read Write	

if	array: see schema	No	Read Only	The interface set supported by this resource
purl	multiple types: see schema	Yes	Read Write	
swupdateaction	multiple types: see schema	Yes	Read Write	
updatetime	multiple types: see schema	Yes	Read Write	

3278     **A.12.6 CRUDN behaviour**

3279     Table A-23 defines the CRUDN operations that are supported on the "oic.r.softwareupdate"  
 3280     Resource Type.

3281                 **Table A-23 – The CRUDN operations of the Resource with type "rt" =**  
 3282                 **"oic.r.softwareupdate".**
